

INTERNAL SAFETY QA'S SHEET **Reduction**

According to requirements of the standard

Issue: 10/11/2020

1. **General information** (fill in the following information)

1.1 **Reference:**

Number of the order / Revision:

Version:

1.2 **Reference description of the substance or mixture and its classification**

Chemical formula:

Structure:

Number of substances in mixture:

Classification: According to the classification based on the GHS or otherwise, with a correct chemical structure and its general properties by formula, also possible, give an identification of the source, including description of the source (e.g. supplier or lot no).

1.3 **Identify the hazard that presents the safety concern**

Reference: GHS:

(Hazard)

Identify hazard:

Reproductive toxicity

Acute Toxicity (oral)

Acute Toxicity (inhalation)

Acute Toxicity (dermal)

Flammable

Signal word:

(GHS)

Indicate hazard by correct signal word

1.4 **Storage code:**

See classification sheet 13

(Hazard ID - 000000)

2. **Identification of the storage concern**

2.1 **Identification of the storage concern**

Is there a possibility of a reaction of the substance

with other substances in storage?

2.2 **Reference:**

Classification according to GHS sheet 13 to 13.0000

Indicate the concern if there is

Identify the concern:

Yes

Indicate the concern and the corresponding GHS hazard

Yes

See classification sheet 13

No

Reproductive toxicity
